Spanish (B1)

CORE COMPETENCIES

- Analytical & data-driven
- Commercial acumen
- Results-oriented
- Stakeholder management
- Team player

WORKED WITH

Fugro • Haskoning
Odido • Waterprof

HOBBIES

Playing guitar • Fitness, Cross-fit,
Running • Learning languages

Mostafa Yaghi

Business/Channel Analyst | AI Automation Founder

• OPEN TO NEW OPPORTUNITIES

01. PROFILE

Summary

I am a driven professional with over two years of experience in data analysis, reporting, and process optimization, with a strong engineering background applied to strategic innovation and organizational change. Outside my main role I run Qynzoo, my own AI automation agency, where I build end-to-end technical products independently – from data pipelines to full-stack web apps. Driven by personal interest, I continuously expand my knowledge of new AI applications and the possibilities to acquire, process, and visualize data.

02. EXPERIENCE

Relevant Work Experience

Business/Channel Analyst
Odido (Previously T-Mobile), Netherlands Jan 2026 -- Present

As a Business/Channel Analyst, I work on data automation and retail performance analytics, turning manual reporting processes into automated workflows and translating retail channel performance into actionable recommendations.

- **Reporting Automation:** Automating recurring retail and channel performance reports, replacing manual spreadsheet-based processes, using python.
- **Dashboarding:** Building and maintaining Liveboards (ThoughtSpot) from saved Answers to support daily retail performance tracking.
- **Retail Analytics:** Analyzing retail channel performance data and presenting findings to stakeholders to drive process improvements.

Project Control Advisor
Haskoning, Amersfoort Nov 2024 -- Jan 2026

As a project controller, I was responsible for planning and risk management of various projects in the infrastructure sector, coordinating collaboration between my team and the client, and leading various internal events.

- **Planning:** Gaining insight into the required activities within the project, including interdependencies, and ensuring clear structure.
- **Risk Management:** Identifying potential bottlenecks, informing both teams, and advising on appropriate measures.
- **Monitoring:** Tracking progress by establishing and reporting KPIs.

Student Coordinator - Project Management
Waterprof, Utrecht Feb 2023 -- Oct 2024

At Waterprof, I was responsible for organizing assignments for various clients in the water sector.

- Coordinating more than 75 students, monitoring performance indicators and customer satisfaction scores.
- Interviewing new students; preparing monthly overviews of worked hours with the manager.
- Responsible for posting on social media, particularly LinkedIn.

03. VENTURES

Independent Ventures & Projects

Founder

Qynzoo -- AI Automation Agency

2026 -- Present

- Founded and independently operate an AI automation agency (registered as an eenmanszaak), helping businesses cut manual work and reduce human error.
- Delivered a full client engagement for Waterprof B.V.: a secure AI agent on Azure, inside Waterprof's own Microsoft environment, that drafts on-brand LinkedIn posts from project documents with a human in the review loop.
- Own the entire client lifecycle solo: scoping, development, delivery, and account growth.

Co-Host & Technical Lead

Podcast Tuhaf -- Islamic Art & Architecture

2026 -- Present

- Co-host an Arabic-language podcast with my father, producing factual, research-based content on Islamic art and architecture.
- Built an end-to-end production pipeline: local GPU-accelerated transcription (Whisper), automated Arabic spell-checking, and English translation for subtitle generation.
- Developed a full React-based podcast management application, including an SRT subtitling studio (ElevenLabs Scribe v2) and a social media analytics dashboard.
- Built a cross-platform content analytics stack (Windsor.ai + Apify MCP) to identify winning content formats – growing the podcast to 50,000+ views.

04. PROJECTS

Relevant Projects & Achievements

AI-driven Workflows

Risk Automation Initiative -- Haskoning

2025

At Haskoning, I participated in the Digital Talent Program, where I developed a RAG agent on n8n that automatically generated infrastructure risk registers based on project information and compared them with previous versions – cutting a 6-hour manual task down to 1 hour, review included.

Machine Learning for Predictive Analytics

Fugro -- MSc Graduation Project

2024

At Fugro, I conducted a machine learning study predicting dike clay's dry unit weight and friction angle, using Random Forest, Neural Networks, Support Vector Machines, Autoencoders, and Optuna for hyperparameter optimization.

- Developed a Python predictive model with hyperparameter optimization.
- Processed datasets of 10,000+ data points with pandas and scikit-learn.
- Created interactive visualizations for technical and non-technical stakeholders.
- Presented findings to management, resulting in implementation of recommendations.

05. EDUCATION

Education

MSc Water Management - Data & Management

University of Twente, Enschede

2022 -- 2024

Relevant courses: Data Analysis, Machine Learning, Statistics, Project Management, Value Engineering, Business Analytics, Decision Support Systems

Thesis: "Machine Learning Applications for Predictive Analytics" – Developed predictive models with Python, focus on data quality and model validation (Grade: 8.5)

BSc Civil Engineering and Management

University of Twente, Enschede

2019 -- 2022

Minor: Smart Cities & Data Science – big data, IoT sensors, and urban analytics

Relevant projects: Dashboard for smart city metrics, data-driven optimization of traffic flows

06. CERTIFICATES

Courses and Certificates

Coaching Certificate

DearProject, Enschede

Training on soft skills, coaching skills, & training skills within the Dear project.

Qualified Value Associate (QVA) – Value Engineering

University of Twente, Enschede

Professional certification in value methodology – optimizing projects by balancing cost, quality, and function to meet client requirements.

07. SKILLS

Skills & Languages
